# Majd Rammal

Computer Engineer / Frontend Web Developer

✉ majdrammal2001@gmail.com  📱 +961 76 984 948  📍 Beirut, Lebanon  🖥 majdrammal.com

## EDUCATION

### General Sciences
International College

*09/2004 - 07/2019*  *Beirut, Lebanon*

### B.E. in Computer and Communications Engineering
American Univeristy of Beirut

*09/2019 - Present*  *Beirut, Lebanon*

## WORK EXPERIENCE

### Frontend Web Developer
Freelance

*05/2022 - Present*  *Remote*

*Achievements/Tasks*

- Engineered responsive, intuitive, efficient and visually appealing websites using HTML5, CSS3, JavaScript (ES6), TypeScript and React.
- Communicated requirements with clients and delivered high-quality results.
- Proficient in creating reusable components in React, as well as fetching and connecting to API's.
- Used Firebase Authentication and Firestore to create registration systems and user profiles.

### Data Analyst (Part-Time)
Trux Logistics

*10/2019 - 08/2022*  *Remote*

*Democratic Republic of Congo's leading transport company with an extensive fleet of over 60 trucks.*

*Main Role*

- Reorganized raw data in reports containing certain patterns and trends that facilitate decision-making. Provied my employer with these reports on a monthly basis.

### Investment Analyst
Middle East Venture Partners

*08/2022 - 09/2022*  *Beirut, Lebanon*

*MEVP is a Middle East-focused venture capital firm that invests in the early and growth stages of innovative technology companies.*

## SKILLS

React · JavaScript (ES6+) · HTML5 · CSS3 · Sass · TypeScript · Bootstrap · Jest · Git · Firebase · Python · Java · Creativity

## PROJECTS

**Autonomous Sumo Robot (09/2019 - 01/2020)**

- Built and programmed a robot as part of a university course project.

**Web Development Projects (05/2022 - Present)**

- Personal Website: Designed and developed my own E-Portfolio using HTML5, CSS3, JavaScript and React.
- Haroun Law Firm: Solely designing and developing the Haroun Law Firm Website.
- AUB Phoenix Project: Currently working with a team of AUB students as the head Full-Stack developer responsible for creating the project's website. Profits from the AUB Phoenix Project will be used to fund scholarship programs at the American University of Beirut.
- Flix: A social media platform that allows users to search for their favorite movies, keep track of what they've watched and connect with friends.
- Reach: A multi-platform chat app for corporate and commercial use.

## CERTIFICATES

**Programming with Javascript**
*In this course, I learned how to use JavaScript and discovered interactive possibilities with modern JavaScript technologies, as well as using Jest for testing code. This course is part of the* Meta Front-End Developer Professional Certificate *offered by Meta.*

**Version Control**
*In this course, I learned how to implement version control systems, navigate and configure using the command line, use and create GitHub repositories and manage code revisions. This course is part of the* Meta Front-End Developer Professional Certificate *offered by Meta.*
